

G-I-B-113

James Carey Farm
Frostburg
Private

1880

The farm consists of a frame house, springhouse, bank barn and several outbuildings. The farmhouse is a 5 bay by 2 bay, 2-story structure with a shorter 2-story ell addition and is covered with asphalt siding. James Carey, an Irishman, built this farmhouse circa 1880. The house and springhouse are excellent examples of their type.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The James Carey Farm, set in slightly hilly terrain, is bisected by Interstate Route 48. The farm consists of a frame house, springhouse, bank barn and several outbuildings.

The farmhouse is a 5 bay by 2 bay, 2-story structure with a shorter 2-story ell addition and is covered with asphalt siding. The main block rests on a stone foundation, the ell on a cement block foundation, and both have standing seam metal gable roofs.

The facade faces N.W. and has a central entrance with a paneled door and 2 pane transom. The facade entrance has a 1-story, 1 bay wide hipped roof porch supported by 4 wooden chamfered posts and jig-sawn, open-worked side balustrades.

There is a 1-story hip roof addition on the N.E. elevation of the ell. Cellar entrances are located on the N.E. elevation of the main block and the S.E. elevation of the ell. There are 2 brick interior end chimneys in the main block and a cinderblock exterior chimney on the S.W. elevation of the ell.

All windows in the main block are 4/4 sash and the present surrounds are narrow plain boards. There are 2 single pane windows at the attic story of both gable ends. All windows in the ell have been altered and include single pane, 1/1 sash and a 3-pane picture window.

A frame springhouse lies just N.E. of the house. It rests on a full-story stone foundation and has an overhang on the N.W. elevation. It is covered with novelty siding with cornerboards and has a corrugated metal gable roof. There is an entrance on the S.W. elevation at the east end, approached by six wooden steps. The doorway has vertical boards and plain board surrounds. There is an entrance on the N.W. elevation under the overhang. The N.W., N.E., and S.W. elevations each have a 6-pane window with plain board surrounds. The spring flows N.W. to S.E. and is covered by a gable roof frame structure, approximately three feet square.

A frame bank barn lies N.E. of the house.
